

How to Choose a Chart

A Statistically Motivated Guide

How to Choose a Chart

Choosing the right chart to represent your data can be a daunting process. I believe that a *starting point* for this thinking is some basic statistical thinking about the *type* of variables that you have. At the broadest level, variables may be conceptualized as *categorical* variables, or *continuous* variables.

- *categorical variables* represent unordered categories like *gender*, or *religious affiliation*.
- *continuous variables* represent a continuous scale like a *mental health scale*, or a *measure of neighborhood quality*.

Once we have discerned the type of variable that have, there are two followup questions we may ask before deciding upon a chart strategy:

- Is our graph about **one thing at a time**?
 - How much of x is there?
 - What is the distribution of x ?
- Is our graph about **two things at a time**?
 - What is the relationship of x and y ?
 - How are x and y associated?

A Few Notes

A Note About Graph Labels

Graphs should have clear titles and labels.

A Note About Software

The principles of graphing discussed in this document transcend any particular software package, and could be implemented in many different software packages, such as SPSS, SAS, Stata, or R.

The graphs in these particular examples use ggplot2, a graphing library in R. ggplot2 graph syntax can be formidably complex, with a somewhat steep learning curve. More information about ggplot can be found [here](#).

A Note About Graph Colors

This document uses colors based upon official University of Michigan colors. Using colors that match the design scheme of your organization may be helpful.

A Simulated Data File of Continuous and Categorical Data

A few randomly selected observations...

	x	y	z	u	v	w	s	q
925	69.24	49.68	130	Group B	Group B	Group A	Group 3	99.24
100	228.1	216	138.5	Group A	Group A	Group B	Group 1	238.1
246	154.1	274.9	171.6	Group B	Group B	Group B	Group 2	174.1
176	102.8	91.03	97.77	Group B	Group B	Group A	Group 1	112.8
326	103.8	133.4	125.6	Group A	Group B	Group A	Group 3	133.8
958	99.76	125.4	111.8	Group B	Group B	Group A	Group 3	129.8
963	103.7	100.4	103.8	Group B	Group B	Group A	Group 3	133.7
631	89.98	125.5	133.4	Group A	Group A	Group A	Group 2	110
122	131.5	136.1	98.7	Group B	Group B	Group A	Group 1	141.5
729	120	112.3	112.7	Group B	Group A	Group A	Group 2	140

One Thing At A Time

Continuous

horizontal barchart of mean

Two Things At A Time

Continuous By Categorical

horizontal barchart of mean by group

horizontal dotchart of mean

horizontal dotchart of mean by group

horizontal lollipop chart of mean

horizontal lollipop chart of mean by group

linechart of mean

linechart of mean by group

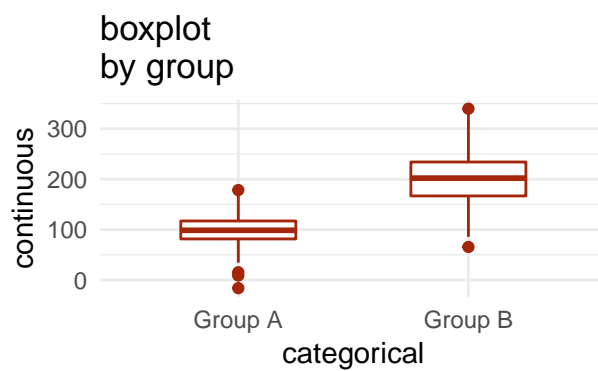

violin plot

violin plot by group

One Thing At A Time

Categorical

pie chart

categorical

doughnut chart

categorical

Two Things At A Time

Categorical By Categorical

pie chart by group

categorical

doughnut chart by group

categorical

Continuous by Continuous

scatterplot

scatterplot with fit line

hexagon plot

scatterplot with smoother

area plot

contour plot

Graphics made with the ggplot2 graphing library created by Hadley Wickham.
